King's Bench Walk

## Steven Snowden QC

Call: 1989

Silk: 2017

### AREAS OF EXPERTISE

Personal Injury, Industrial Disease, Public Inquiries, Group Litigation, Inquests, Insurance, Costs, Clinical Negligence

Steven Snowden QC is recognised in the independent legal directories as one of the leading barristers in the country in his chosen areas of work.

He is one of only three QCs who have been nominated as PI Silk of the Year for the Chambers & Partners Bar Awards in November 2021.

Steven's main areas of practice are high-value, complex or sensitive personal injury and industrial disease cases, group litigation and public inquiries. His practice extends to associated insurance, professional negligence and clinical negligence work. He works for claimants and for defendants.

Steven is a strong and experienced trial advocate and regularly deals with substantial and complex cases in court and in settlement meetings. His current case-load includes the liability and quantum aspects of head injuries, paraplegic and other serious spinal injury cases, amputations, psychiatric injuries and fatal claims. In disease work he deals with mesothelioma and other asbestos claims, and other occupational illness claims involving difficult issues of liability, causation or quantum. He is currently acting for the largest group of the infected and affected individuals and families (1,400+ core participants) in the Infected Blood Public Inquiry.

He is the elected Chair (2020 – 2022) of the Personal Injuries Bar Association, a member of the Bar Council and has for many years been one of the authors of the Judicial College Guidelines for the Assessment of General Damages in Personal Injury Cases.

### Industrial Disease

---

Recognised as a leading silk both in the Chambers & Partners Guide and in the Legal 500 and identified as one of only 10 silks nationwide in the "spotlight table" for industrial disease in the Chambers & Partners Guide.

Steven works on his own or with a junior in the full range of industrial disease work. He predominantly now acts for claimants in respect of asbestos-related illnesses (mesothelioma, lung cancer, asbestosis, etc). But he also works in technical disease cases of all sorts for claimants and defendants including carbon monoxide (anoxic brain injury) cases, stress claims and higher-value or group industrial disease litigation.

This work regularly involves complex issues of limitation, breach, causation and apportionment and dealing with expert medical and engineering evidence. In mesothelioma claims he is very familiar with the process of taking evidence on

commission and with the “show cause” procedure. He regularly deals with high-value fatal claims.
